

# CLEANING PROCEDURES

## DAILY CLEANING:

1. Remove drip tray and cup holder, empty contents in appropriate place and replace.
2. Open the bean hopper and fill.
3. Rotate powder spouts and remove inside canisters. Fill with product.
4. Clean the canister area using a clean, soft cloth.
5. Replace canisters. Remember to rotate powder spouts to original position.
6. Press and release “B” to wash mixing bowl. Repeat until dispensing clear water.

## WEEKLY CLEANING:

1. Follow steps 1-4 above.
2. Clean the mixer.
  - a. Remove mixing bowl. Clean with warm water and soft cloth. Dry thoroughly and replace.
  - b. Replace canisters. Remember to rotate powder spouts to original position.
  - c. Press and release “B” to wash mixing bowl. Repeat until dispensing clear water.
3. Clean the group brewing chamber.

*Note: Use special 2-3g detergent tablets for super-automatic coffee machines.*

  - a. Press “C” on the gray remote and then “A” (up) or “B” (down) until you see “O30 Test Machine” on the display on the top front of the door.
  - b. Press “D” (enter) and then “A” or “B” until you see “Group Cleaning”. Press “D”. After a little time, the display will tell you “insert tablet”. Insert tablet into black funnel on top of brewing chamber and close the door.

*Note: Once the machine starts the cleaning cycle, it cannot be stopped.*
  - c. When the cleaning cycle has finished, the machine will resume normal service.
  - d. Remove drip tray, empty contents in appropriate place and replace.
4. Clean the front of the machine with a clean, soft cloth.

## Important Safety Instructions:

**Turn Off Power Switch (back left) Before Removing the Mixing Bowls**
