ELEVATE Your Experience

Sleek.

This one word perfectly captures the essence of this design. With an all glass face, Innovative has reimagined the glass door model.

Please visit
www.experienceINNOVATIVE.com
for more groundbreaking concepts.

Innovative products are design focused, priced competitively and manufactured to the highest quality control standards. This model features an elegantly designed frameless glass door whereby the glass sits on the frame versus inside as traditionally seen.

The net effect is an all glass face providing a premium look to any guestroom. Custom colors, finishes and hardware are available.

VENTILATION REQUIREMENTS

Above is a diagram displaying the (3) cabinet cutout options for a properly ventilated environment.

Both intake vents marked in green are required.

The ventilation process involves cold air entering the furniture at the base, passing through the cooling system, and warm air rising and escaping.

It is important to maintain a minimum clearance of 2 inches from the rear wall and 1.5 inches on the sides and top of the unit within the furniture cabinet. The cooling system requires unobstructed air circulation.

If ventilation grills are installed, each opening should have a minimum area of 32 square inches. Additionally, the unit should be placed on a level surface for optimal performance.
